

BRIGHT GALVANISING SPRAY - SCB550

TECHNICAL DATASHEET

DESCRIPTION

High quality spray providing active metal protection against corrosion and an excellent primer coat.

BENEFITS

High zinc purity for maximum corrosion protection.
Can be used over previously coated surfaces.
Can be over-coated.

DIRECTIONS

Ensure surface is clean, dry and free from grease. Shake can until agitator ball can be heard and then for a further 1-2 minutes. Spray light coat from 25-30cm. Further coats can be added to build up the required thickness. Allow 15-30 minutes dry before over-coating. When finished, invert can and spray to clear the nozzle.

TECHNICAL DATA

Appearance:	Silver.
Odour:	Solvent/ paint aroma
Contents:	Acrylic and silkyd resins, micronized zinc, micronized aluminium and treat clay, xylene, acetone and 1-methoxy-2-propanol with propane/butane propellant
Storage:	Below 50°C. Shelf life of 9 months.
Flash Point:	<0°C
Relative density:	0.92
Solubility:	Insoluble in water.
Pack sizes:	12 X400ml cans.
